

## **Mandana Menbari, DVM, BSc**

I am currently a veterinarian at the Santa Clara County Animal Shelter. I am originally from San Jose and graduated from Ross University in 2017. I started working at a general practice right after graduation and have since found a passion for shelter medicine. I enjoy going out once a month to HomeFirst to give our transient population access to veterinary care and services. Outside of work I enjoy hiking, video games, and spending time with my dog and two cats.
